International Transportation Guide 2005 TRANSIT

International Transportation Guide
2005 TRANSIT

Letter from the Minister of Equipment and Transport

Dear fellow citizen,

After a year of hard work, you now prepare to go on holiday. You earnestly want to go back to the country to see your family and friends again, and to enjoy the sun, the beautiful beaches and the wonderful landscapes of Morocco.

The organization of this yearly return operation which benefits from the benevolent support of His Majesty King Mohammed VI, May God Assist Him, is receiving our full attention at the Ministry of Equipment and Transport.

Indeed, we feel particularly concerned about the conditions of your travel, transit and, above all, your safety. Significant efforts have been made continually to diversify, ensure and improve transportation services in Morocco. Every year and in addition to the conjunctural reinforcement programs designed to cope with the summer peak period, new lines resulting from the reform policies in the sector are created in air, maritime and land transportation modes.

To provide you with practical informations on the possibilities offered by the various modes of transportation to travel to and from Morocco, we are launching this year an "International Transportation Guide – 2005 Transit" which will be updated on a yearly basis prior to the "summer transit" so as to ensure the reliability of the information provided on programs and contacts.

It is important to inform you in advance so that you can plan your journey and stay in complete safety and at the best value. You will notice when using this guide that you have plenty of interesting choices in terms of transportation supply and modes.

Air services of the Kingdom have registered noticeable development since the liberalization of the sector in 2004. Several European companies have joined the Moroccan skies and have been operating new regular air lines, providing more available flights and better rates from which you can get the most.

Letter from the Minister

Considerable efforts are made for a better control of international transportation buses, especially to contain the phenomenon of illegal and informal transportation. In this respect and for your safety, I particularly recommend you to buy your transportation tickets from organized companies that are duly authorized by the authorities in both origin and destination countries.

Last, to improve the comfort conditions of your travel and stay, the department accelerated the implementation of the last section of the Northern motorway, linking Tangier and Asilah, in order to make it ready by the beginning of the 2005 transit operation.

This motorway section will be commissioned at the beginning of July to help you save precious time and, above all, to ensure you more road safety. As far as road safety is concerned, you should know that the use of car seat belt, has become mandatory in Morocco and that it is now prohibited to use mobile telephones while driving your car. The fine for breaches in the two cases may be as high as 200 DH.

If you are reading these words, this means you had access to the guide, but you should know, however, that it is intended for Moroccans living abroad and that it is available free of charge at consulates and embassies of the Kingdom, as well as in reception centers of the Mohamed V Foundation for Solidarity. It can also be consulted at the Ministry's website: www.mtpnet.gov.ma.

Welcome and take time to enjoy your travel and your holidays !

*Karim GHELLAB

NOTRE OBJECTIF

Réussir l'opération de transit des MRE grâce à un service de qualité à la hauteur des attentes des MRE

Pour assurer le transit des passagers dans des conditions de rapidité, de sécurité et de confort, l'ODEP entreprend d'importants efforts de modernisation et d'adaptation des installations portuaires.

D'importants projets ont été concrétisés :

- La réalisation d'un terminal à passagers au port de Nador
- L'extension des installations d'accostage au port de Tanger
- L'aménagement de zones ombragées dans tous les ports de transit
- L'amélioration de l'accueil et l'assistance des passagers

National Company of Morocco's Motorways

II Reinforcement Scheme

This scheme which seeks to define the development needs and guidelines regarding motorway infrastructures provides for the construction by the year 2010 of 1500 km according to the following axes:

- *The North- South axis is made of 3 components that link:*
 - *Casablanca to Tangier, Tétouan and Fnideq*
 - *Casablanca to Marrakech, Agadir and Taroudant*
 - *Casablanca to El Jadida*
- *The East- West axis linking Rabat to Fez and Oujda*

The motorway developments under construction are as follows :

- *2002- 2005: Asilah- Tangier Motorway (30 Km)*

This section starts at the level of the Asilah grade- separated interchange and bypasses the Oued Rharifa Valley. It turns westwards by crossing the Tahadart wadi, but remains distant from the coastal strip.

The expected traffic of this motorway link upon its commissioning in 2005 is assessed at 4,800 vehicles/day.

- *2002- 2005: Had Soualem – Tnine Chtouka Motorway (35 Km)*
- *2004- 2006: Tnine- Chtouka- El Jadida Motorway (28 Km)*
- *2003- 2005: Settat Ring Road (17 Km)*
- *2004- 2007: Tétouan- Fnideq Motorway (28 Km)*
- *2004- 2006: Settat- Marrakech Motorway (145 Km)*
- *2004- 2007: Tangier- Mediterranean Port Motorway*
- *2005- 2007: Doubling of the National Road 16 linking the port to Fnideq (18 Km)*

The next achievements entrusted with ADM are :

- 2005- 2009: Marrakech- Agadir Motorway (233 Km)*
- 2006- 2010: Fez- Oujda Motorway (320 Km)*

Road Safety

Before Leaving

- *Get your car checked by a mechanic, as an examination before you set off on holiday is a must;*
- *Make a map simulation of the itinerary you intend to follow. This is the best way to make arrangements and avoid hazards;*
- *Be in good form and have a fresh and alert mind, by having a good night's sleep.*

Tires :

They should be very reliable to ensure a perfect road grip.

Good tires must have no cracks and should be pumped up according to safety standards (200 additional grams) to avoid blow-outs which are among the major causes of road accidents.

Lights :

They must be appropriately adjusted to see and be seen without however, dazzling the other drivers. Remember that you are not alone on the road, and your safety must not harm that of other people.

Brakes :

Without an appropriate brake adjustment, there is no possible safety. This obvious fact is good to repeat because the matter is about the safety of our close relatives.

Shock absorbers :

They are not made for comfort only, they also ensure an improved vehicle handling on roads.

Engine or automotive mechanics :

Nothing could be worse than a sudden car breakdown on the road, far away from any mechanic. An engine overhaul will help you to avoid this type of trouble which causes loss of time, stress... and, consequently, insecurity.

Heading for Morocco

Once you have finished these safety measures, you can set off, but be careful !

- *No excess load! An overload has a bad impact on vehicle handling;*
- *Children must seat in the rear with safety belts fastened;*
- *Leave your rear range unobstructed to ensure good visibility at all times;*
- *Let a relative help you during the journey. He/She may remind you of the road number to follow and the stops you should make, bearing in mind that these should take place once every 200 to 250 km.*
- *Make regular stops during your journey. These will help you to have refreshing breaks to avoid drowsiness, to stretch your legs and to get off on the right foot.*
- *Traveling with other vehicles is possible, but we advise you not to, as it is hard to keep the necessary safety distances between vehicles. The safest way is to arrange to meet in previously agreed places or in roadside rest areas.*
- *Respect strictly the speed limit, and road signs & markings.*

Act as a good citizen, aware of the great responsibility resting on him/her. Your life is at stake, as well as that of your relatives and other people.

Remember that these safety precautions are also valid for the return.

*The National Committee for Traffic Accidents Prevention welcomes you in your beloved country.
Have a good stay !*
